Profile

Safety Project Manager with experience in infrastructure, aviation and industrial environments. Leading risk assessments, incident investigations, safety planning and compliance activities. Managing safety projects in natural gas, hazardous materials and aerial field operations. Coordinating contractors, executing safety plans, and managing audits and inspections. Driving continuous improvement and embedding safety culture across operational environments. Managing complex international projects end-to-end, from setup phase to final client delivery.

Education

M.A. in Aviation Management Present
Jones University, California

B.A. in Agricultural Sciences (Animal Science) Present
The Hebrew University of Jerusalem

Employment

Safety Project Manager 2023 - 2025
GE – Gas Turbine Power Station, Orot Rabin

- Managing safety in a national gas turbine project with complex infrastructure scope
- Conducting risk assessments, analyzing incidents and ensuring regulatory compliance
- Supervising contractors, enforcing field protocols and overseeing high-risk operations
- Enforcing controls for high-risk zones and working-at-height activities on-site
- Developing and executing safety plans including emergency, fire and PPE procedures
- Preparing the site for audits by the Labor Ministry, fire department and global bodies

Safety Project Manager 2020 - 2023
Technip Energies – Karish & Tanin Gas Project

- Managing site safety in a complex gas project: tunneling, drilling and PRMS stations
- Overseeing daily safety operations, submitting reports and liaising with global teams
- Coordinating between contractors, regulators and clients to meet HSE requirements
- Leading engineering risk reviews, investigating failures and implementing controls
- Enforcing site-wide HSE protocols and initiating structured corrective action plans
- Supporting inspections, guiding managers and writing site-specific safety procedures

Ground Operations & Safety Manager 2013 - 2019

Chem Nir – Aerial Firefighting Division

- Managing safety across all divisions: hangars, airfields, chemicals and aerial operations
- Developing safety frameworks for airstrips, maintenance zones and flight operations
- Investigating incidents, analyzing risks and drafting emergency and operational protocols
- Managing both operational and civilian risks in aerial, ground, and chemical activity
- Training teams, supervising daily execution and enforcing compliance on the ground
- Driving organizational safety culture and leading structured improvement processes

Global Operations Manager

2004 - 2013

CAL Cargo – Airborne Cargo & Agri Equipment

- Managing air cargo operations between Israel and Belgium, including global compliance
- Overseeing ground logistics, site safety, loading protocols and operational coordination
- Supervising international cargo hubs, process safety and aviation-grade documentation
- Coordinating between airports, regulators and logistics providers across regions
- Ensuring air and ground safety in projects involving sensitive agri-industrial cargo
